Subject: EASA Acceptance of Non-Critical PMA Parts

Dear Valued Customer,

Able Aerospace's FAA Approved Non-Critical PMA parts are accepted by EASA via the Bilateral Agreement between EASA and FAA. The documented Procedure is titled Technical Implementation Procedures for Airworthiness and Environmental Certification. The current revision is Revision: 4, 9/22/14.

Excerpted from page 2-22

Direct Acceptance by EASA of PMA Design Approvals.

EASA shall directly accept PMA approvals, without further showing, for modification and/or replacement parts for installation on products certified or validated by EASA in the following cases:

- (1) The PMA part is not a "critical component." (See definition, paragraph 1.6(i); or
- (2) The PMA part conforms to design data obtained under a licensing agreement from the TC or STC holder according to 14 CFR 21.303; or
- (3) The PMA holder is the holder of an EASA STC, which incorporates the PMA part.

Excerpted from page 2-23

FAA PMA Parts Requiring Explicit Design Authorization by EASA.

An explicit EASA design authorization is required prior to using PMA parts as modification and/or replacement parts when:

- (i) the PMA part has not been produced under a licensing agreement from the TC or STC Holder according to 14 CFR 21.303; and
- (ii) the PMA part is a "critical component." (See definition, paragraph 1.6(i)).

Excerpted from page 1-8

1.6(i)"Critical Component" means a part identified as critical by the design approval holder during the product type validation process, or otherwise by the exporting authority. Typically, such components include parts for which a replacement time, inspection interval, or related procedure is specified in the Airworthiness Limitations section or certification maintenance requirements of the manufacturer's maintenance manual or Instructions for Continued Airworthiness.

Attached is a listing of Able Aerospace EASA accepted (FAA Approved) PMA parts for your reference.

Sincerely,

Paul Pfaffenberger
Quality Manager
